

Airpay Academy — Production Stabilization Guide

Complete Playbook for LMS Administrators

Version: 1.0 | **Date:** April 2026 **Owner:** Nitin Rajput, Head of L&D **Audience:** L&D Team, LMS Administrators, IT Operations **Classification:** Internal — Airpay Payment Services

How to Use This Guide

This document contains everything needed to stabilize the Airpay Academy production LMS before the Academy 2.0 platform upgrade. It is organized into:

- **Part 1:** Current State (what the data shows today)
- **Part 2:** Problems Identified (what is wrong and why it matters)
- **Part 3:** Target State (what "clean" looks like)
- **Part 4:** Cleanup Instructions (step-by-step, with SQL queries)
- **Part 5:** Course Cleanup Checklist (all 74 duplicated courses with proposed new codes)
- **Part 6:** Verification (how to confirm each fix is correct)

Execute the workstreams in parallel. Each section is self-contained.

PART 1: Current State Analysis

1.1 Platform Overview

Metric	Value
Platform	Moodle 4.x + BizLMS Multi-Tenant Plugin
Database	MySQL 8.0.44 on AWS RDS (ap-south-1)
Active Theme	epsilon (to be replaced by airpayux)
Total Users	3,374
Total Courses	443
SCORM Packages	881 (263 unique)
Course Completions	56,000+ records
Certificates Issued	8,822
Quiz Attempts	308,000+
Learning Plans	20+
Organizational Units	213 costcenters across 3 tenants

1.2 Tenant Structure

ID	Tenant Name	Shortname	Path	Users (est.)	Courses	Sub-Orgs
1	AIRPAY PAYMENT SERVICES PVT LTD	AirPay	/1	2,200	188	205
77	Public (External)	external	/77	760	184	1
177	ZEEA	ZEEA01	/177	15	15	4
-	Orphaned (paths /80, /100)	-	-	154	1	0

1.3 Airpay Internal Hierarchy

The Airpay tenant (/1) contains 205 sub-organizations across 4 depth levels:

- /1 AIRPAY PAYMENT SERVICES PRIVATE LIMITED
 - /1/2 Airpay Payment Services (Airpay Acquiring)
 - /1/2/3 Acquiring Sales (Key Accounts, New Business, Sales-Govt)
 - /1/2/4 Alliances and Partnerships
 - /1/2/5 Emerging Business (International Sales)
 - /1/2/6 Finance (AP, AR, Audit, Taxation)
 - /1/2/7 Human Resources (Admin, Culture, Operations, L&D, Payroll)

- /1/2/8 HOD (Management)
- /1/2/9 Marketing
- /1/2/10 Operations
- /1/2/11 Product
- /1/2/12 Technology
- /1/79 Vyaapaar Fintech (774 users on leaf /1/79/93/97)
- /1/114 AFT and other subsidiaries

1.4 User Distribution

Organizational Path	Users	Percentage	Notes
/1/79/93/97 (Vyaapaar Fintech)	774	42.5%	Largest subsidiary, single leaf node
/77 (Public/External)	423	23.2%	Hiring, BC, partners, vendors
/100 (ORPHANED)	113	6.2%	No matching costcenter exists
/1 (Airpay root)	42	2.3%	Users at root, not assigned to department
/1/114/122/* (AFT)	~100	5.5%	AFT subsidiaries
/80-81 (ORPHANED)	41	2.3%	No matching costcenter exists
/1/2/* (Acquiring departments)	~300	16.5%	Distributed across 12 departments
/177 (ZEEA)	~15	0.8%	Smallest tenant

1.5 Role Assignments

Role ID	Role Name	Assignments	Percentage
5	Employee (student)	4,106	99.98%
9	Administrator (manager)	1	0.02%

Critical finding: Only 1 administrator in the entire system. No middle management tier (L&D coordinators, content managers).

1.6 Course Shortname Convention (Current — Inconsistent)

Courses created over the years follow different naming patterns:

Pattern	Example	Tenant	Meaning
xxxI##	FEI02, BTI01, BLI04	Airpay (/1)	"I" = Internal
xxxE##	FEE02, BTE01, BLE04	Public (/77)	"E" = External
xxxx0001	PFWB0001, BCS0001	Airpay (/1)	Early courses, 4-digit numbering
E000#	E0002, E0003, E0004	Public (/77)	Early external courses
SA##	SA38, SA44	Airpay (/1)	Skill Assessments

PE#	PE5, PE13	Public (/77)	Pre-Employment assessments
Alphanumeric	A0002, A0009, DM0001	Mixed	No clear convention

PART 2: Problems Identified

Problem 1: Content Duplication (CRITICAL)

Severity: HIGH | **Impact:** Every course update requires double work

74 courses exist in both the Airpay and Public tenants. Each was manually re-created with a different shortname. Zero courses share the same shortname across tenants, confirming there is no automated deployment mechanism.

- 188 courses on Airpay (/1)
- 184 courses on Public (/77)
- 74 exact-name duplicates across both tenants
- 112 Public-only courses
- 114 Airpay-only courses

When a course is updated (e.g., AML compliance content changes after RBI regulation), the update must be applied manually to BOTH tenant copies. With different shortnames, there is no programmatic way to identify or link the pairs.

Estimated waste: At 30 minutes per course duplication, the 74 duplicated courses represent ~37 hours of historical duplication effort. Every future update multiplies this.

Problem 2: SCORM Storage Bloat (HIGH)

Severity: HIGH | **Impact:** 3.3x storage waste, update inconsistency risk

Metric	Value
Total SCORM instances	881
Unique SCORM zip files	263
Duplication factor	3.3x
Most duplicated file	story.zip (74 instances)

The `story.zip` filename is the default Articulate Storyline export name. It appears 74 times, making it impossible to identify which content each instance contains without opening every one.

Banking/financial compliance modules are duplicated 5-6 times each:

- 4.12_Red Flags_Ver01.zip: 6 instances
- 1.9_Role of Banks in financial inclusion_Ver01.zip: 5 instances
- 1.8_Recent Trends In Banking_Ver01.zip: 5 instances
- 1.7_Evolution of Banking in India_Ver01.zip: 5 instances

Problem 3: Orphaned Users (HIGH)

Severity: HIGH | **Impact:** 154 users (8.5%) cannot be properly tenant-scoped

Path	Users	Costcenter Exists?
/100	113	NO

/80, /81	41	NO
----------	----	----

These users are assigned to organizational paths that do not exist in the mdl_local_costcenter table. BizLMS cannot properly scope content, reports, or permissions for them.

Problem 4: Learning Plan Duplication (MEDIUM)

Severity: MEDIUM | **Impact:** Plans diverge silently, inconsistent learning paths

Learning Plan	Airpay Copy	Public Copy	Status
Customer Success Foundation	LP06, 37 courses, 28 completions	LP02, 42 courses, 11 completions	DIVERGED (different course counts)
HR Onboarding	HOVC01, 38 courses	HROBC01, 38 courses	In sync (for now)

Customer Success Foundation Path has already diverged: the Public version has 5 more courses than the Airpay version. This means employees on different tenants are following different learning paths for the same program.

Problem 5: Flat Permission Model (MEDIUM)

Severity: MEDIUM | **Impact:** Single point of failure, no delegation

Only 1 administrator account exists. 4,106 users all have the identical "Employee" role. There are no:

- L&D coordinators per subsidiary
- Content managers per department
- Reporting managers with team visibility

All content management flows through a single admin account.

Problem 6: Inconsistent Naming (MEDIUM)

Severity: MEDIUM | **Impact:** Cannot search, filter, or report on courses reliably

Multiple naming conventions co-exist. No standard mapping between shortname and course content, category, or tenant.

PART 3: Target State

3.1 Course Naming Convention

Standard: BU-CATEGORY-NUMBER

Business Unit Prefixes

Prefix	Organization	When to Use
ALL	Shared across all tenants	Compliance, soft skills, common training
AP	Airpay Acquiring	Product-specific, Acquiring-only content
VF	Vyaapaar Fintech	Vyaapaar-specific content
AFT	AFT	AFT-specific content
ZE	ZEEA	ZEEA-specific content
PUB	Public/External	Hiring assessments, BC training, partner content

Category Codes

Code	Domain	Examples
COMP	Compliance	AML, POSH, Data Privacy, RBI regulations
SOFT	Soft Skills	Communication, Leadership, Critical Thinking, Time Management
PROD	Product Training	PG, ERP, Acquiring products, features
TECH	Technical / IT	JIRA, tools, systems, coding
ONBD	Onboarding	HR onboarding, role-specific induction
FLIT	Financial Literacy	Banking, Investment, Tax Planning, Insurance
BCTR	Business Correspondent	BC-specific training modules
HIRE	Hiring Assessments	Pre-employment tests, skill assessments
SAFE	Safety and Security	IT security, workplace safety
LEAD	Leadership Development	Leadership styles, team management
SALE	Sales Training	Pitching, negotiation, client management

Examples

Old Code(s)	New Code	Course Name
AML01 / AMLE001 / AML26	ALL-COMP-001	Anti Money Laundering
EESCS001 / EESCS0001	ALL-SOFT-001	Communication Skills

FEI02 / FEE02	ALL-FLIT-001	Mutual Funds
BTI01 / BTE01	ALL-SALE-001	Post Sales Support
SA38 / PE5	ALL-HIRE-001	Junior Frontend Developer Assessment

3.2 Course Category Structure

Replace the current organic category tree with:

- Compliance (AML, POSH, Data Privacy, RBI Regulations)
- Soft Skills (Communication, Leadership, Critical Thinking, Stress Management)
- Financial Literacy (Banking, Insurance, Investment, Tax, Retirement)
- Sales Training (Pitching, Negotiation, Communication, Presentation)
- Product Training (PG Products, ERP, Acquiring Products)
- Technical and IT (JIRA, Security Awareness, Systems)
- Onboarding (General, Airpay, Vyaapaar)
- BC Training (Banking Basics, Compliance, Sales for BCs)
- Hiring Assessments (Technical, Behavioral, Domain)
- Leadership Development
- Safety and Security

3.3 Role Model

Role	Who	Capabilities
Site Administrator	Head of L&D + IT (2-3 people)	Full system access
L&D Admin	L&D team members (2-3 per tenant)	Create/edit courses, manage users, manage learning plans within assigned tenant
Manager	BU managers with direct reports	View team completion status, compliance dashboard
Employee	All internal learners	Access assigned courses, track own progress, earn certificates
External	Hiring candidates, BC trainees, partners	Access assigned courses only, no internal content visibility

PART 4: Cleanup Instructions

Workstream A: Data Integrity

A1. Export Orphaned Users for HR Review

Run this query on production (READ ONLY):

```
SELECT id, username, firstname, lastname, email,  
       open_path, FROM_UNIXTIME(lastaccess) AS last_login  
FROM mdl_user  
WHERE (open_path LIKE '/80%' OR open_path LIKE '/100%')  
AND deleted = 0 AND suspended = 0  
ORDER BY open_path, lastname;
```

Export results to CSV. Send to HR for classification:

- Active employee: reassign to correct organizational path
- Former employee: suspend account
- Test account: suspend or delete
- Never logged in: safe to suspend

A2. Find ALL Users on Invalid Paths

```
SELECT u.id, u.username, u.firstname, u.lastname,  
       u.open_path, u.lastaccess  
FROM mdl_user u  
LEFT JOIN mdl_local_costcenter cc ON u.open_path = cc.path  
WHERE cc.id IS NULL  
AND u.deleted = 0  
AND u.open_path IS NOT NULL AND u.open_path != ''  
ORDER BY u.open_path;
```

Target: This query should return ZERO rows after cleanup.

A3. Check for Duplicate Email Accounts

```
SELECT email, COUNT(*) as cnt,  
       GROUP_CONCAT(username) AS usernames  
FROM mdl_user  
WHERE deleted = 0  
GROUP BY email  
HAVING cnt > 1;
```

For each duplicate: determine which account is active, suspend the other.

A4. Reassign Orphaned Users (After HR Approval)

For each user that HR confirms is active, update their path:

```
UPDATE mdl_user
SET open_path = '/1/2/7',
    timemodified = UNIX_TIMESTAMP()
WHERE id = [USER_ID]
AND open_path LIKE '/100%';
```

Replace '/1/2/7' with the correct department path from HR.

For users to be suspended:

```
UPDATE mdl_user
SET suspended = 1,
    timemodified = UNIX_TIMESTAMP()
WHERE id = [USER_ID];
```

A5. Verify Enrolment Integrity

Check for cross-tenant enrolment mismatches:

```
SELECT u.id AS userid, u.username,
       u.open_path AS user_path,
       c.id AS courseid, c.fullname,
       c.open_path AS course_path
FROM mdl_user_enrolments ue
JOIN mdl_enrol e ON e.id = ue.enrolid
JOIN mdl_course c ON c.id = e.courseid
JOIN mdl_user u ON u.id = ue.userid
WHERE u.deleted = 0
AND SUBSTRING_INDEX(u.open_path, '/', 2)
    != SUBSTRING_INDEX(c.open_path, '/', 2)
LIMIT 200;
```

Workstream B: Organizational Structure

B1. Public Tenant Segmentation

The Public tenant (/77) currently serves multiple audiences without distinction: hiring candidates, BC trainees, partners, vendors, and franchise operators.

Recommended approach (pre-Academy 2.0): Use existing BizLMS user fields to tag audiences rather than creating sub-organizations:

- Set `open_group` field to: "Hiring", "BC", "Partner", "Vendor", or "Franchise"
- This enables filtering in reports without restructuring

Steps in BizLMS Admin:

1. Site Admin -> Local -> Manage Organizations -> Public
2. Note: Do NOT create sub-orgs yet (defer to Academy 2.0)
3. For existing users, bulk-update via CSV import with `open_group` values

B2. ZEEA Tenant Status

Confirm with stakeholders:

- If ACTIVE: Ensure ZEEA users can access required shared courses
- If DORMANT: Suspend ZEEA user accounts, hide ZEEA courses
- If PILOT: Document scope and timeline

B3. Ghost Costcenter Audit

Find costcenters with zero users (potential dead nodes):

```
SELECT cc.id, cc.fullname, cc.shortname, cc.path, cc.depth
FROM mdl_local_costcenter cc
WHERE NOT EXISTS (
    SELECT 1 FROM mdl_user u
    WHERE u.open_path = cc.path
    AND u.deleted = 0
)
ORDER BY cc.path;
```

Review each empty costcenter:

- If it is a structural parent (has child costcenters with users): KEEP
- If it is a leaf node with no users and no courses: Mark for cleanup
- Do NOT delete until confirmed no courses reference it

Workstream C: Course Cleanup

C1. Apply New Naming Convention

For each course being renamed:

1. Navigate to Site Admin -> Courses -> Manage Courses
2. Find course by current shortname
3. Edit course settings
4. Update shortname to new BU-CATEGORY-NUMBER format
5. Update fullname if needed for consistency
6. Save changes

Or via SQL (batch rename after testing on one course first):

```
UPDATE mdl_course
SET shortname = 'ALL-COMP-001',
    timemodified = UNIX_TIMESTAMP()
WHERE id = 41;
```

C2. Retire Duplicate Courses

For each duplicate pair (see Part 5 for full list):

1. Determine which copy is the master (the one to keep)
2. Check completion counts on both copies:

```
SELECT c.id, c.shortname, c.fullname, c.open_path,
       COUNT(cc.id) AS completions
FROM mdl_course c
LEFT JOIN mdl_course_completions cc ON cc.course = c.id
WHERE c.id IN ([MASTER_ID], [DUPLICATE_ID])
GROUP BY c.id;
```

3. NEVER delete a course with completions. Instead, hide it:

```
UPDATE mdl_course
SET visible = 0,
    timemodified = UNIX_TIMESTAMP()
WHERE id = [DUPLICATE_ID];
```

4. Add a note to the hidden course summary: "Superseded by [NEW_CODE]. Hidden [DATE]."

C3. Create New Category Structure

In Site Admin -> Courses -> Manage Categories:

1. Create top-level categories matching Section 3.2
2. Create sub-categories as listed
3. Move courses to correct categories:

```
UPDATE mdl_course
SET category = [NEW_CATEGORY_ID],
```

```
timemodified = UNIX_TIMESTAMP()  
WHERE id = [COURSE_ID];
```

C4. Consolidate Learning Plans

After course cleanup:

1. Identify mirrored learning plans (e.g., Customer Success LP06 and LP02)
2. Compare course lists between the two plans
3. Merge into one plan with all courses from both
4. Reassign users from the retired plan to the consolidated plan
5. Hide the retired plan

Workstream D: Permissions (After A, B, C Complete)

D1. Create L&D Admin Role

In Site Admin -> Users -> Define Roles -> Add a New Role:

- Role name: L&D Administrator
- Short name: ladmin
- Description: Can manage courses, users, and learning plans within assigned tenant
- Context types: System, Category
- Key capabilities to allow:
 - moodle/course:create
 - moodle/course:update
 - moodle/course:visibility
 - local/courses:manage
 - moodle/user:viewdetails
 - block/learnerscript:viewreport

D2. Assign L&D Admins

For each L&D team member:

1. Site Admin -> Users -> Assign System Roles
2. Select "L&D Administrator" role
3. Search for the user and assign
4. Scope assignment to their tenant's costcenter context

PART 5: Course Cleanup Checklist

All 74 Duplicated Course Pairs with Proposed New Codes

Legend: Keep = Master copy to retain | Hide = Duplicate to make invisible

Financial Literacy Courses (30 pairs)

#	Course Name	Airpay ID	Airpay Code	Public ID	Public Code	New Code	Keep	Hide
1	Tax Planning	258	FEI01	80	FEE01	ALL-FLIT-001	Decide	Decide
2	Mutual Funds	175	FEI02	99	FEE02	ALL-FLIT-002	Decide	Decide

	Dev					019		
71	Digital Marketing Expert	33	DME0001	35	DM0001	ALL-TECH-004	Decide	Decide
72	Time Management	36	TM0001	37	TM0001E	ALL-SOFT-020	Decide	Decide

Hiring Assessments (2 pairs — cross-purpose)

#	Course Name	Airpay ID	Airpay Code	Public ID	Public Code	New Code	Keep	Hide
73	Junior Frontend Developer Assessment	348	SA38	267	PE5	ALL-HIRE-001	BOTH	-
74	Emerging Business Manager Assessment	354	SA44	281	PE13	ALL-HIRE-002	BOTH	-

Note: Hiring assessments (rows 73-74) may intentionally exist in both tenants for different purposes (internal skill assessment vs pre-employment). Review whether these should remain as separate courses or be merged.

PART 6: Verification Checklists

After Workstream A (Data Integrity)

- ☐ Query A2 (users on invalid paths) returns 0 rows
- ☐ Query A3 (duplicate emails) returns 0 rows
- ☐ All 154 orphaned users either reassigned or suspended
- ☐ HR sign-off received on user disposition decisions

After Workstream B (Org Structure)

- ☐ ZEEA tenant status confirmed and actioned
- ☐ Public tenant users tagged with open_group values
- ☐ Ghost costcenter audit complete — dead nodes documented
- ☐ All users have a valid open_path matching an existing costcenter

After Workstream C (Course Cleanup)

- ☐ All 74 duplicate pairs reviewed — Keep/Hide decisions made
- ☐ Master copies renamed to BU-CATEGORY-NUMBER format
- ☐ Duplicate copies hidden (visible=0), NOT deleted
- ☐ Hidden courses have "Superseded by..." note in summary
- ☐ New category structure created and courses moved
- ☐ Learning plans consolidated (no mirrored duplicates)
- ☐ Completion records preserved on all hidden courses

After Workstream D (Permissions)

- ☐ L&D Administrator role created with correct capabilities
- ☐ L&D team members assigned to their tenant scope
- ☐ Manager role tested — can see team completion
- ☐ Employee role tested — cannot see admin functions

Final Sign-Off

- ☐ All verification checklists above are complete
- ☐ No queries return unexpected results
- ☐ Each role's dashboard view tested and correct
- ☐ Production backup taken BEFORE starting any modifications
- ☐ Production backup taken AFTER all changes complete
- ☐ "Ready for Academy 2.0" confirmed

Appendix A: Decision Log

Date	Decision	Rationale	Decided By
April 2026	Cleanup in 3 parallel workstreams	Data integrity, org structure, and course cleanup can proceed independently	Nitin Rajput
April 2026	Master copy is per-course decision	Some courses originated on Airpay, some on Public. No blanket rule works	Nitin Rajput
April 2026	Vyaapaar keeps current flat structure	Current structure matches real org setup	Nitin Rajput
April 2026	Orphaned users: investigate before action	Need HR verification — may be active employees, former, or test	Nitin Rajput
April 2026	Public tenant: multi-purpose external	Serves hiring, BC, partners, vendors, franchise	Nitin Rajput
April 2026	Course naming: BU-CATEGORY-NUMBER	Enables filtering by org, domain, and sequencing	Nitin Rajput
April 2026	Public segmentation: tag via fields, not sub-orgs	Minimal disruption pre-Academy 2.0	Nitin Rajput

Appendix B: Execution Timeline

Week	Tasks
Week 1	Export orphaned users (A1), check duplicate emails (A3), confirm ZEEA status (B2), generate course audit spreadsheet (C2)
Week 2	HR returns user decisions (A1), Nitin completes course audit (C2), approve naming convention (C1)
Week 3-4	Reassign or suspend users (A4), create categories (C3), rename courses (C1), hide duplicates (C2), create L&D Admin role (D1)
Week 5	Run all verification queries, test each role, take final backup, confirm "Ready for Academy 2.0"

Appendix C: Important Warnings

1. ALWAYS take a full database backup before making ANY changes
 2. NEVER delete a course that has completion records. Hide it instead (visible=0)
 3. NEVER run fix_bizlms_columns.php on production (it was for local dev only)
 4. The open_costcenterid column does NOT exist on production. BizLMS resolves it dynamically from open_path. Do not attempt to add it.
 5. Test each SQL UPDATE on a single record first before running batch updates
 6. After any structural changes, purge all Moodle caches: Site Admin -> Development -> Purge all caches
-

Document generated from production database analysis (airpayprod backup, 6th April 2026). All data is read-only analysis; no production modifications were made during preparation of this guide.
